Notes (please attach imaging protocol):				

Exceptional Release Agreement

Please only complete this agreement if Exceptional Release tissue is acceptable

As part of MedCure’s protocol to ensure the safety of researchers / educators and handlers of these specimens, MedCure only supplies specimens from donors that have tested negative for infectious diseases. All specimens that are distributed by MedCure have been tested at CLIA certified labs using validated methods for cadaveric specimens to confirm that they do not contain evidence of infection with HIV, Hepatitis B, or Hepatitis C. MedCure engages in screening donor medical records for COVID-19 and Relevant Communicable Disease Agents and Diseases (RCDADs), as outlined by the AATB, to ensure there is no evidence of active infection that would put researchers / educators and handlers of specimens at risk. Screening covers, but may not be limited to Human Transmissible Spongiform Encephalopathy (TSE), Creutzfeldt-Jakob (Mad Cow) disease or any other prion disease, and tuberculosis.

When MedCure has identified that a donor does not meet normal screening and release criteria (that the donor is positive or suspected to have a condition) as listed above, then MedCure cannot distribute the tissue unless the tissue user requests the tissue for research and education and acknowledges knowingly that it was found to be positive or high risk for one or more of the RCDADs indicated. The intent of this form is to document the acknowledgment from researchers / educators that the requested tissue does not meet MedCure normal screening criteria.

This form may also be used to record instances when shipment of tissue occurs prior to MedCure obtaining all test and medical record results required under normal evaluation and release protocols; in these cases, MedCure will provide results once available.

Requestor Acknowledgment

I understand that by signing here I am requesting / accepting tissue with a higher potential risk of exposure to infectious diseases, that the tissue does not meet MedCure’s normal screening criteria, and that I am responsible for using universal precautions when handling tissue.

I will alert anyone encountering this tissue of the potential presence of infectious diseases so that they are aware of the risks and the need for universal precautions.

Circumstances of Exceptional Release Tissue Requestor is Agreeing to Receive *(please select all that apply)*:

High risk for COVID-19

High risk for HBV

High risk for HIV

High risk for HCV

Tissue pending Infectious Disease Testing Results *(Once available, Medcure will provide results)*

(The company where the specimens will be cremated/incinerated, not the delivery location)

Disposal Company Contact Name: _____

Phone or Email: _____

(The person at the disposal company who could provide specific details about the how and when of cremation/incineration)

Address of Disposal Company: _____

Describe How Specimens will be Transported to Disposal: _____

Documentation of final disposition, along with a complete accounting of specimen used, shall be supplied to MedCure upon request. You must be able to provide documentation from the disposal company regarding date of pickup for disposition, including Donor Numbers.

By signing and/or entering your name below you are acknowledging that you have been approved to receive and have authority to order anatomical specimens from MedCure, Inc. and agree to abide by the MedCure, Inc. Application & Agreement for Anatomical Specimens for Research & Education.

By signing/entering your name below you also agree:

- No Transfer of specimen will occur without prior written MedCure Authorization.
- To always treat the donated specimens in a dignified and respectful manner.
- Specimens are provided for the described use ONLY; there is **no** transfer of ownership to the end user.
- To consult appropriate federal, state, and local authorities concerning the safe handling and disposal of human specimens.
- Human anatomical specimens will only be used and handled by trained and technically qualified individuals.
- That special care and strict adherence to all governmental regulations and safe laboratory practices shall be maintained when using human specimens.
- That security measures shall be in place for maintaining the custody of anatomical specimens before, during, and after use, **especially** during events with potential public exposure.
- The anatomical specimens shall **NOT** be used for transplantation.
- To pre-arrange all specimen returns with MedCure personnel.
- To properly package all returns in accordance with MedCure Specimen Return Instructions.
- To pay all fees associated with this request. Including but not limited to applicable shipping, procuring, special preparation, and cancellation fees.
